

ADAM UP GAMES: Shuttle Runs

Player 1 Shuttles

Player 2 Shuttles

ADAM UP GAMES: Shuttle Runs

Skill: 2-digit addition and subtraction

Players: 2

Equipment: Two dice, a pencil for each player

Mission: An expedition up Mount Expo is being planned but only the first person to complete 6 shuttle runs will go. Who will get chosen?

How to play:

1. Both players start at 0 where they place their pencils.
2. Player 1 rolls both dice to make a 2-digit number. For example, if they roll a 4 and a 3 they could make the number 43 or 34. They add this on to their current position. Player 2 then does the same.
3. When a player gets to 100, they have completed a shuttle run and get a point. Players do not need to land exactly on 100.
4. After getting to 100, they turn around and subtract 2-digit numbers from the dice. When they reach 0 (or further back), they receive a point and turn around again.
5. The first player to reach 6 points wins.
