# ADAM UP GAMES: Sneak Attack

**Skill:** Multiples

**Players:** 2–4

**Equipment:** Two dice, 2 counters, game board

**Mission:** You are in a race to the finish but watch out, the Multiguys are sneaking up on you. Who will win?

## How to play:

1. Roll both dice and move along the number grid
2. Once all players have rolled, a player rolls 1 dice
3. The number on the dice is the multiples that the Multiguy is jumping—if a Multiguy lands on a player, they must go back to the yellow box from the row they are on

*Example:* If the dice shows a 4, the Multiguy will move in jumps of 4. If a player was on 12, they would have to move to the yellow box on their row because 12 is a multiple of 4.

4. Play continues until someone reaches 100 (the finish)
