# Robot Maths - Converting units of area

**Example:**

1) Point to the unit of measurement you are starting with

2) Follow the path until you get to the unit you want to use

$\div100$ $\div10{,}000$ $\div1{,}000{,}000$

mm^2 → cm^2 → m^2 → km^2

$\times100$ $\times10{,}000$ $\times1{,}000{,}000$

3) Make your final answer clear using a full number sentence

$\div10{,}000$

m^2 → ha

$\times10{,}000$

hectare

Robot Maths - Converting units of area

Example:

1) Point to the unit of measurement you are starting with

$\div 100$ $\div 10{,}000$ $\div 1{,}000{,}000$

mm^2 → cm^2 → m^2 → km^2

2) Follow the path until you get to the unit you want to use

$\times 100$ $\times 10{,}000$ $\times 1{,}000{,}000$

3) Make your final answer clear using a full number sentence

$\div 10{,}000$

m^2 → ha

$\times 10{,}000$

hectare
